Release 1.6.66 – 17/06/2021

Whilst we at More4apps have tried to maintain the same look and user interaction, some functionality has been modified due to bug fixes to the code. You can still use your current template worksheets in the new version, provided they were created in version 1.6.32 which incorporates the new color scheme.

There are no functional changes in this version. However there are a few major bug fixes around 'Price Break Type'.

Release 1.6.32 – 12/05/2020

1.1. New More4apps Brand Applied

Version: 1.6.24

Date: 24/04/2020

This will have no functional impact on users and is purely a cosmetic update.

Existing templates with previous styles will work with this version, please note however the colors may change in these sheets when invoking Wizard functionality.

Release 1.6.03 – 06/08/2019

This release includes various bug fixes and enhancements/changes to the Wizard. In the scenario that an old template is copied into the new version of the Wizard, any new columns need to be added into the copied sheet to ensure new functionalities work.

1.1 Added New Modifier Line Type: 'Other Item Discount'

Version: 1.6.02

Date: 02/08/2019

Added new Modifier Line Type: Other Item Discount - Gives a price adjustment or benefit to a specified item on an order when the customer orders one or more other items on the same order.

1.2 Improved performance of Data Download and Upload

The Wizard now has better performance of data download and upload.

1.3 Added 'Logging' and 'Help' buttons to the product ribbon

Logging: Click the ‘Logging’ button before upload and a new worksheet will record all actions taken by the Wizard. This new worksheet will be labelled ‘M4A – Query Log’ and will hold all upload information.

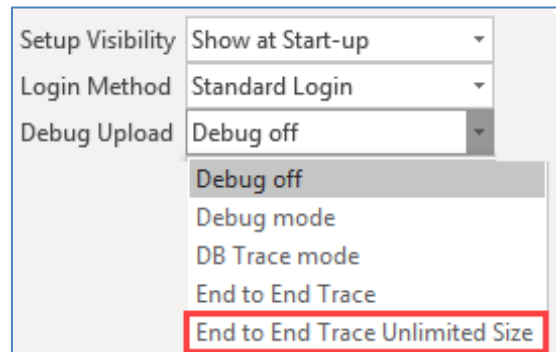

This is helpful for support to ensure that More4Apps has all the information required to resolve your issue.

Help: This button has three options:

- User Instructions – Link to the More4Apps online User guide for Element Entry Wizard.
- Release Notes – Link to the list of all version releases for the Wizard.
- Product Support – Link to the More4Apps support page where issues/requests can be logged by completing the form details.

Click [here](#) for more information on the ‘Pricing Modifiers Wizard Ribbon’ regarding the above buttons.

1.4 Added ‘End to End Trace Unlimited Size’ to Debug Upload option on the Setup Ribbon

This option allows the maximum size of trace files created whilst debugging to become unlimited. This resolves the scenario when trace files are too large that they were being truncated. A message box will be displayed when this option is chosen allowing the user to cancel and not set the trace off.

Note: Please only use this under More4Apps advice. A very large trace file may be created. If you are unsure, please use the End to End Trace’ option rather than the ‘End to End Trace Unlimited Size’ option.
