1.2. Revision DFF fields have now been added to the Wizard.....	9
1.3. Applied language patch to fix Oracle 12.2 framework update.....	10
1.4. Exploder Functionality Added.....	11
1.5. Column Changes/Additions	11

Release 4.3.81 – 17/06/2021

1.1. Update

Version: 4.3.81

Date: 17/06/2020

Whilst we at More4apps have tried to maintain the same look and user interaction, some functionality has been modified due to bug fixes and enhancements to the code. You can still use your current template worksheets in the new version. There are no functional changes in this version.

Release 4.3.66 – 15/06/2020

1.1. New More4apps Brand Applied

Version: 4.3.61

Date: 04/04/2020

This will have no functional impact on users and is purely a cosmetic update.

Existing templates with previous styles will work with this version, please note however the colours may change in these sheets when invoking Wizard functionality.

- Improve download functions of Download form including the impact of ECO on the routing.
- Improved the Cost Type LOV functions.
- Improve validation messages to be more meaningful.

Release 4.3.39 – 01/08/2019

The following includes details of the incremental fixes, functionality changes and or additions to the Routing Wizard as part of its development and release process.

Whilst we at More4Apps have tried to maintain the same look and user interaction, some functionality has been modified. You can still use your current template worksheets in the new version. For information on these changes, please see below:

1.1. New Color Scheme

Version: 4.3.26

Date: 12/06/2019

More4Apps has implemented a new logo and color scheme. See below for an example:

Upload Results					Header															
Header Status	Cost Type Status	Operation Status	Resource Status	Alt Resource Status	Header Message	Routing Upload Mode	Inventory Org Code	Assembly	Assembly Description	Item Status	Alternate	Capable to Promise	Engineering Routing	Priority	Completion Subinventory	Completion Locator	Routing Comments	Common Routing	Common Routing Description	
Default Values						Update														
Accepted		Accepted	Accepted			Update	M1	SB34701	Base Assembly	Active	Primary	Yes	No							
Error		Validated	Validated		Cannot be	Update	M1	OC58102	Drive Option Class	Active	Primary	No	No		FGI			CN62441	Sentinel Base Model	
		Validated	Validated																	
		Validated	Validated																	
		Validated	Validated																	
		Validated	Validated																	
		Validated	Validated																	
		Validated	Validated																	
		Validated	Validated																	
Accepted		Accepted	Accepted			Update	M1	MC08830	Plastic Housing - Gray	Active	Primary	Yes	No							
		Accepted	Accepted																	
		Accepted	Accepted																	
		Accepted	Accepted																	

No column names have been added or modified.

1.2. Stopped downloading Operations from unimplemented ECOs

Version: 4.3.21

Date: 14/05/2019

As like EBS the Routing Wizard now stops downloading Operations from unimplemented ECOs.

1.3. Download Flow Routings - but is not set up to Validate/Upload them

Version: 4.3.38

Date: 31/07/2019

Upload Results					Header								
Header Status	Cost Type Status	Operation Status	Resource Status	Alt Resource Status	Header Message	Routing Upload Mode	Inventory Org Code	Assembly	Assembly Description	Item Status	Alternate	Capable to Promise	Engineering Routing
Default Values						Update							
							M1	AS16105	Cosmic Hero II GAMEBX2	Active	Flow	No	No
							M1	SB55105	SW - Standard Set	Active	Flow	No	No

'Flow' routing can now download via 'Download using sheet data'.

1.4. Alternate is now Mandatory

Version: 4.3.23

Date: 27/05/2019

Inventory Org Code

Assembly ...

Description

Alternate

'Alternate' is now required.

Release 4.3.16 – 14/01/2019

The following includes details of the incremental fixes, functionality changes and or additions to the Routing Wizard as part of its development and release process.

Whilst we at More4Apps have tried to maintain the same look and user interaction, some functionality has been modified. You can still use your current template worksheets in the new version. For information on these changes please see below.

1.1. Functionality for Effective Dates - Now ALLOW PAST DATES profile option from the sheet

Version: 4.2.87

Date: 08-11-2018

Added functional security controls over uploading and downloading Budgets.
Two new profile options added:

- More4Apps: GLW Disable functional security preventing downloads to override download function security control
- More4Apps: GLW Disable functional security preventing uploads to override upload function security control

1.2. New Section - Resource Alternates

Version: 4.3.09

Date: 11-11-2018

Alternate Resources	Alt Resource Upload Mode	Alt Resource	Alt Resource Description	Replacement Group	UOM	Alt Basis	Alt Usage	Alt Inverse Usage	Alt Schedule Sequence	Alt Substitute Group Number	Alt Assigned Units	Alt Schedule	Alt Offset	Alt Principal Flag	Alt Setup Type	Alt Activity	Alt Standard Rate	Alt Charge Type	Delete Alt Resource
	Update	DL-LBR1	Labor Resource -	10	HR	Item	98	0.01020408	10	10	1	No	0	No			No	WIP move	

Added new section 'Resource Alternates. If this section is not required, this can be excluded from the sheet.
This section also supports Descriptive Flexfields.

Note - For this new section there is a required minimum version for the product packages.
Spec 1.2.3 06-Nov-18 Body 1.3.6 06-Nov-18

Release 4.2.86 – 22/12/2017

The following includes details of the incremental fixes, functionality changes and or additions to the Routing Wizard as part of its development and release process.

Whilst we at More4Apps have tried to maintain the same look and user interaction, some functionality has been modified. You can still use your current template worksheets in the new version. For information on these changes please see below.

1.1. Attachment Sequence Numbers now will download in ascending order

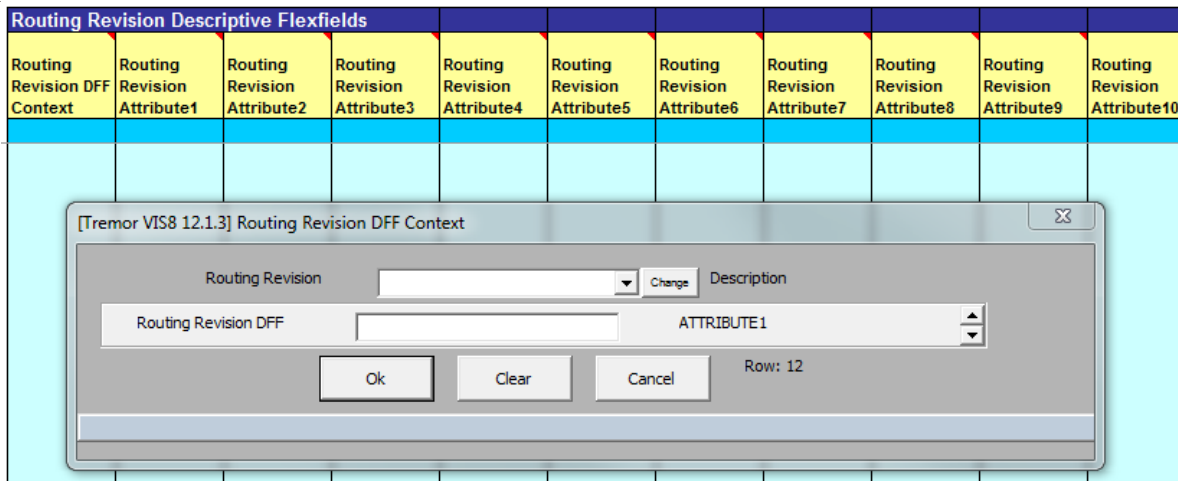

Version: 4.2.16

Date: 16/08/2016

1.2. Revision DFF fields have now been added to the Wizard

Version: 4.2.23

Date: 17/10/2016

Revision DFF fields have been added to the Wizard.
 Attributes available for this functionality range from Attribute1 - Attribute 15

Note - These columns are not required so there should be no impact when removing or copying previous version templates to this Wizard.

1.3. Applied language patch to fix Oracle 12.2 framework update

Version: 4.2.57

Date: 12/05/2017

Applied language patch to fix Oracle 12.2 framework update. This Oracle update has stopped us from being able to select a language from the EBS browser login page.

If the wrong language value is defaulted into the drop-down box it is unable to be changed. Visually it may appear changed but it will not be respected by Oracle. Therefore logging in with the wrong language.

In order to fix this we now have the Wizard default the language based on the Oracle Preferences. Therefore the language for the user is now being set from user's EBS preferences irrespective of what is chosen on the browser Login page.

1.4. Exploder Functionality Added

Version: 4.2.72

Date: 01/12/2017

In the Download Form the “Explode” functionality has been added.

When the ‘Explode’ button is selected you explode a Bill of Material, providing a list of all the routings for the Assembly and all of its components (if they themselves have a Bill of Material). The number of levels downloaded is based on the Bill of Materials setup parameter: Max Bills Levels.

Before you can invoke an Exploded Download you must validate the item by clicking the ‘[...]’ button next to the Assembly. You cannot enter an Assembly To, however you can invoke all the other download criteria as per the standard download.

This functionality won’t have any impact on you the user if you were to move to this new version, this will only provide additional functionality.

1.5. Column Changes/Additions

This release has had the new Revision DFF columns added to the Wizard. These columns are used to handle the Descriptive Flexfields of Revisions in Oracle E-Business Suite. In the scenario that an old template is copied into the new version of the Wizard, these columns are not required so standard practice can be resumed.

However, if the Routing Revision DFF's are required then the 'Routing Revision DFF Context' column will be required.

Routing Revision Descriptive Flexfields															
Routing Revision DFF Context	Routing Revision Attribute1	Routing Revision Attribute2	Routing Revision Attribute3	Routing Revision Attribute4	Routing Revision Attribute5	Routing Revision Attribute6	Routing Revision Attribute7	Routing Revision Attribute8	Routing Revision Attribute9	Routing Revision Attribute10	Routing Revision Attribute11	Routing Revision Attribute12	Routing Revision Attribute13	Routing Revision Attribute14	Routing Revision Attribute15
